vitrium

Jose Rizal University uses Vitrium Security to protect their valuable intellectual property (IP) and prevent their sensitive & confidential content from being copied or shared. With Vitrium, Jose Rizal University ensures the certifications they develop are not accessed by their competitors.

ORGANIZATION:
Jose Rizal University

INDUSTRY:
Education

VITRIUM USER SINCE:
2018

Jose Rizal University (JRU) is a leading educational institution based in the Philippines which offers basic and higher education. Their goal is to become a platform to help develop students who become responsible and useful citizens. They seek to provide quality education and to be market leaders in the use of technology for innovations in teaching and learning.

"
We were concerned our manuals & documents for accreditation & certification would find their way into our competitors' hands.
"

The Challenge

The manuals and documents that the team at JRU works hard to create are sensitive and confidential. They are needed to grant certification and accreditation to students, and it is crucial that they are kept exclusive and do not land in the hands of their competitors.

JRU needed a solution to easily and securely deliver this sensitive, valuable content without incurring the risk of it being copied or unlawfully shared.

They needed to distribute their content through a system that guaranteed seamless sharing of accreditation requests and other confidential files with their users, without the risk of intellectual property theft.

For JRU, it was crucial that they could revoke access to users who were no longer authorized, and control access even if files were downloaded locally instead of accessed online.

The Solution

JRU relies on Vitrium to protect & share their sensitive content with users without the need for any plug-ins or apps.

"It is crucial to us that we can both protect the document and rescind rights to access to employees who were no longer authorized or no longer with the company. Thanks to Vitrium, we can rest assured our IP is protected."

Augusto Fabella
JRU Vice-President for Quality, Linkages,
and Technology-Enabled Learning

The Solution

Vitrium enables JRU to thoroughly protect their manuals and documents, giving them control over who can access content and when.

They rely on Vitrium's several DRM settings & controls:

- ✓ Copy and print limits
- ✓ Dynamic watermarks
- ✓ Expiry settings
- ✓ Downloadable protected PDF

Watermark	Advanced Options

+ Add Watermark   ✖

|	
Name *	Watermark1
Type	user specific
Text *	Copyrighted Content SELECT TO INSERT ▾
Placement	Bottom
Alignment	Center

* indicates a required field

✓ SAVE & EXIT

The Approach

They enable their employees to view protected content via:

- ✓ Vitrium's secure web viewer
- ✓ A downloadable protected PDF

Vitrium allows JRU to securely distribute sensitive fles while offering their users a nice, easy to use interface that does not require them to download any third party apps.

The Result

With the support of Vitrium, JRU has:

Ensured their valuable content is not available to their competitors.

Protected their intellectual property, the livelihood of their organization.

Gained control over their sensitive and confidential manuals and documents.

Reduced their paper manual distribution from as many as 45 hard copy manuals to just 3.

vitrium

"

After looking at different options, like Locklizard, Bynder, Caplinked, it was clear Vitrium was the best solution. Their user interface is nice and easy to use, they do not require plug-ins or apps, and their team is very responsive!
