Create your branded Secure Client Portal with Vitrium Security. Offer your audience a secure place to access all videos, audio, documents, and images associated with their credentials.

Included in the Professional and Enterprise editions of Vitrium Security, the Central User Portal empowers content owners and publishers to create a custom URL, add brand colors and logos, and enable simple self-service account administration tasks like user registration and password recovery. Our Secure Client Portal gives customers another viable option for how to distribute content, offering a full platform for video, document, and image viewing, secure sharing and storage.

Benefits of Vitrium's Secure Client Portal

Quick Set Up and Deployment. Vitrium Security's Central User Portal can be set up within minutes. When you launch your branded Secure Client Portal, uploaded files to Vitrium Security become available through the portal, in addition to the traditional generating of a Secure Web Link and Secure PDF version of the files. That is, users that have permission to access the content will be able to do it through the portal, saving you from having to email or upload the file to a 3rd party system. All permission settings for users and content files are automatically applied to content shared through the Central User Portal. With just a click of the mouse and a few items to set up, you can deploy your Central User Portal in minutes.
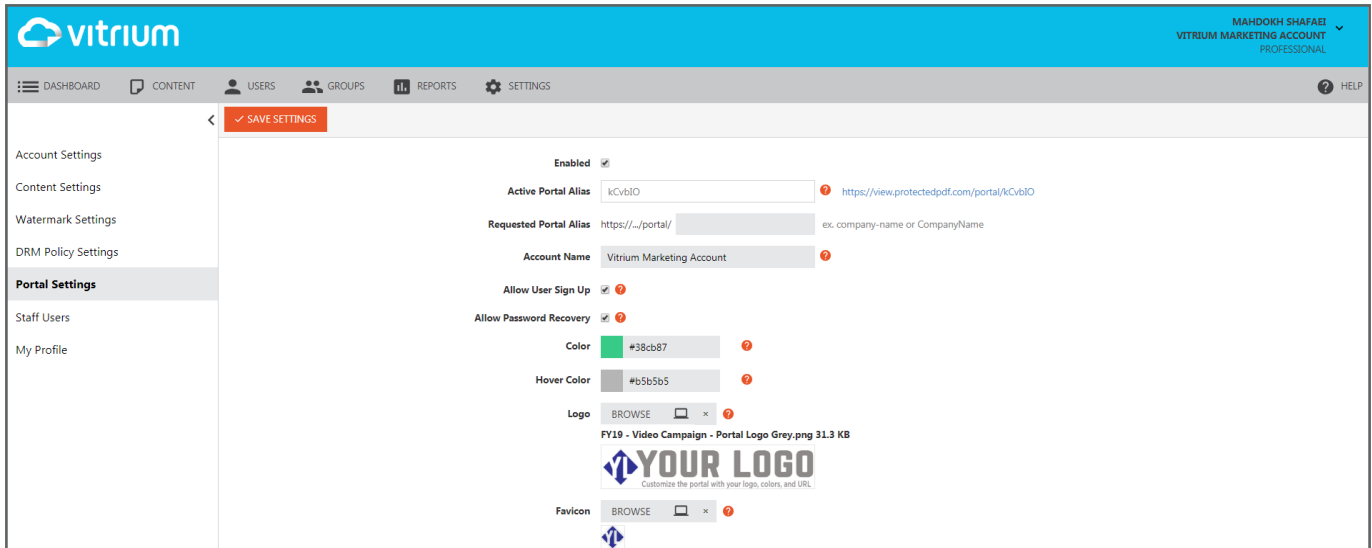

Customize to Match Your Brand. Create a branded and password-protected area for their audience to access secured videos, documents, and images. Vitrium's Central User Portal empowers content owners and publishers to create a portal with:

- Custom URL and Account Name
- Self-service account settings for users like user sign-up and password recovery
- Add your company colors for consistency in branding
- Add your organization's logo and favicon for a personalized experienced

Secure Content Distribution. Users accessing Vitrium protected videos, documents, or images can do so on any device and do not have to download any viewing app or plug-in. Users logging in to the Central User Portal will also benefit from single sign-on functionality, where logging in to the portal will automatically unlock all documents related to that user's account. The combination of document encryption, digital rights management, and secure file sharing technology makes Vitrium Security a complete business solution for secure document publishing and distribution.
