ABOUT VITRIUM WEB VIEWER

The Vitrium Web Viewer, also known as Vitrium Viewer, is a secure web viewer that can be accessed by users on any device on any major browser without any apps or plug-ins to download. The sleek, modern web viewer comes with offline access capabilities, numerous page-viewing features, highlighting, note-taking, and other annotation features.

How it Works

The Vitrium Viewer is one of 2 secure formats available with Vitrium's DRM solutions for protecting documents and images.

When PDF documents, images, or other document formats ge uploaded into a Vitrium solution, the content and all its fonts, images, and graphics get converted to a web format and protected with AES encryption. The resulting content is protected and cannot be edited.

The Vitrium Viewer user interface and functionality may differ button will not appear. If annotations are not allowed, then the

About Vitrium

Vitrium delivers content protection and digital rights management (DRM) software to companies that need to protect their videos, documents, images, and audio files.

With over a million end users worldwide and a range of solutions that empower businesses to protect, control, and distribute their content in different ways, Vitrium is the preeminent choice for businesses, government, educational institutions, and content providers across the globe.

Vitrium was the first DRM provider to focus on a "no plug-in, no proprietary apps" approach and this is still the #1 reason why customers choose Vitrium over other solutions.
