Multi-Channel Distribution: Secure & Simple	3
About VitriumOne	5

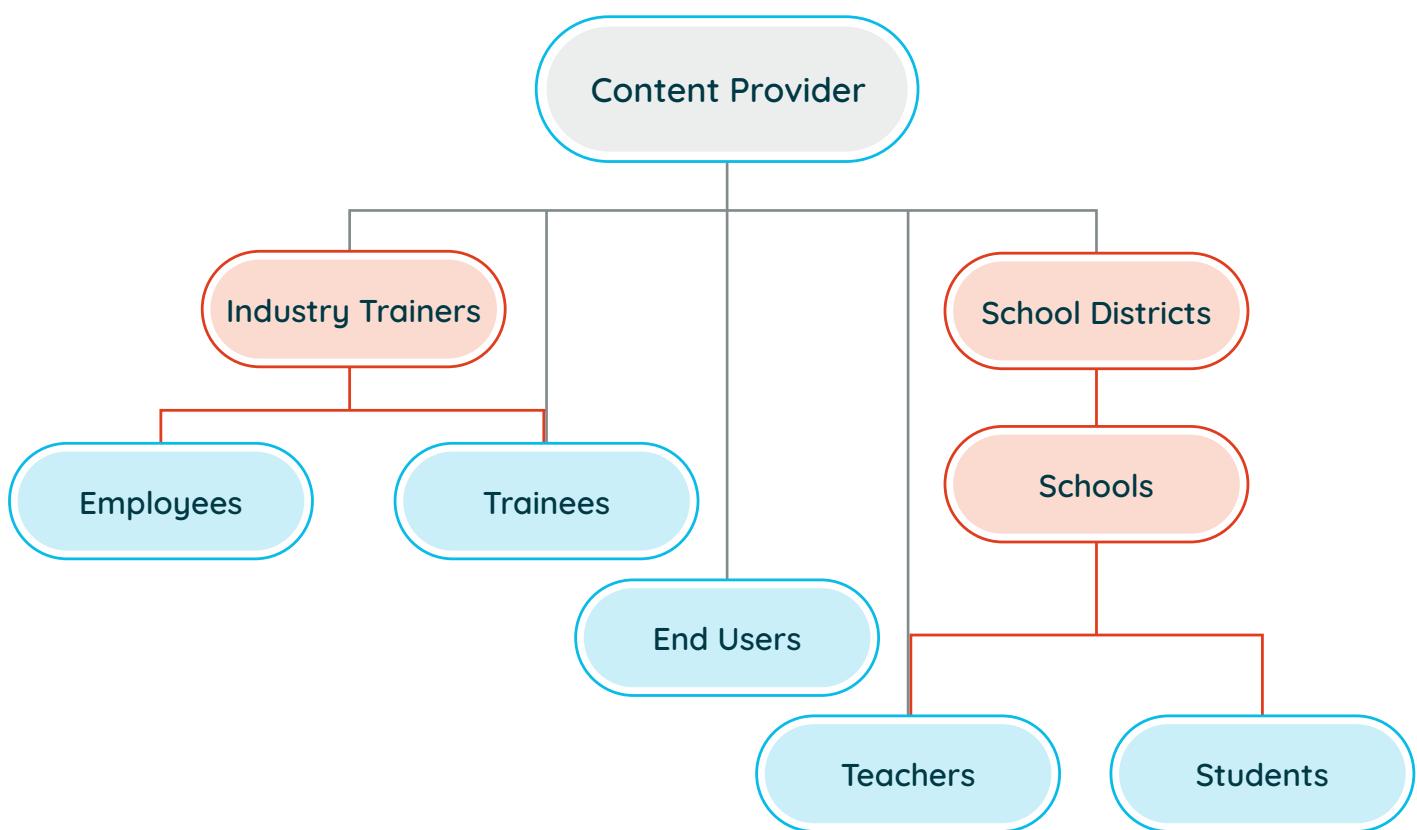

## Introduction

Being a digital content developer or provider, you may need to share your valuable content through a multi-channel network. **VitriumOne** allows you to easily distribute content securely. You can provide materials to educators, trainers, or organizations that need to re-distribute it to students, trainees, or employees, with **no risk of content piracy**.

It uses encryption and digital rights management (DRM) controls to protect your revenue-generating digital content, while providing you and your customers with the ability to distribute across a multi-channel user structure in a safe and controlled manner.

## Multi-Channel Distribution: Secure & Simple

- Grant different permission levels to authorized customers.
- Your customers can independently share licensed content to users.
- Users can access content through a fully customized web portal.
- Content is available in a web viewer format with highlighting and annotation tools.

# About VitriumOne

With VitriumOne:

manage, distribute, and protect  
your content all in one place.

Organize it into different modules or courses,  
and ensure that it is thoroughly protected  
with Vitrium's expert encryption technology  
and DRM controls.

**Provide protected content to  
your authorized users without  
any hassle!**
